## Connecting competences for innovative solutions!

### About us

The FPI e.V. is the network for innovation in the food sector, bringing together food manufacturers, equipment industries and scientific institutions. FPI's mission is to support companies in mastering current challenges and successfully taking advantage of market opportunities.

As a network we create a trustworthy communication framework, combine the competencies of our members and partners and thus create the solutions for success in the markets of the future.

Current focal points of our activities and projects are Quality & Safety, Resource Efficiency, Digital Transformation, Technology Transfer and Human Resources Management.

Detailed information available at: <http://www.foodprocessing.de/english/>
