SAXONY!

A Location at Its Best

About us

The Saxony Economic Development Corporation was founded in 1991 as a state-owned enterprise of the Federal State of Saxony and has been active in three key fields since that time. It promotes Saxony as a business location and advises potential investors comprehensively from the initial idea all the way to the implementation of their relocation projects. The WFS assists Saxony's companies in achieving their export goals and initiates cooperations with companies located outside of Saxony. The objective is to open up new international markets for Saxony's business community and to create new jobs in Saxony. That means, economic development builds bridges, for Saxon companies on their way into the world and for investors on their way to Saxony. An important basis for the effective work of WFS is its strategic focus on the Saxon core industries. The foresighted recognition of relevant technology trends and their inclusion in the settlement and sales promotion business as well as in location marketing is a field of expertise that WFS has intensified for several years. Our portfolio for your success

WE HAVE COMPETENT CONTACT PERSONS FOR YOUR SPECIFIC BRANCH AND QUERY

A vital prerequisite for our work is that we're strategically geared towards Saxony's core competences in the fields mobility (automobile industry, logistics, rail technology, aerospace industry), microelectronics / ICT, machine and plant construction, environmental and energy technology, life sciences as well as such other industrial branches which are relevant for Saxony as, for example, the food industry.

TO ASSURE YOUR BUSINESS SUCCESS: WE IDENTIFY TECHNOLOGY TRENDS AND INITIATE TECHNOLOGY TRANSFER

The anticipatory identification of relevant technology trends and their integration into our business relocation and sales promotion activities as well as into locational marketing are a competence field which is increasingly emphasized and put center stage by the Saxony Economic Development Corporation (WFS). The goal is to not only establish the business location Saxony on the global market in a more specific manner.

OUR SERVICE: FORGING PARTNERSHIPS

We are service providers on behalf of domestic and foreign companies trying to find business partners and suppliers from Saxony. Are you looking for the right distributors or suppliers in Saxony? Do you need a suitable technical solution, an innovative product or procedure for your company? Are you in search of any licensees or joint venture partners for your innovative technology? Would you like to find matching partners in order to jointly implement your research and development projects?
