Honey is our passion

About us

For over 85 years our Bavarian family company in its third generation has served as a guarantor for high quality honey specialties. Our enthusiasm for this wonderful natural product and the careful craftsmanship of our beekeepers guarantees a pleasure that you just have to love. Our quality demands are higher than required by the German Honey Regulation. Single varietal honey and an esteeming relationship with our contract apiarists apply to every single one of our honeys.

Our product range includes our Classics, Fairtrade honeys, honeys in dispensers, honey sticks, buffet dispensers for large volume consumers and much more.

Our portfolio for your success

In more than 85 years of company history a lot has happened in our honey assortment. Whether traditional types of honey or innovative speciality – the natural product reinvents itself again and again. Each type of honey is completely unique in taste and consistency. Creamy or liquid, mild or strong, light or dark – everybody will find his favorite honey. We offer a wide variety of selected honeys in the best quality: raw, unfiltered, 100% natural and in accordance with Germany's strict and permanently controlled honey law.

The varieties of Rapsflower, Golden Selection Honey, Mountain Blossom, Forest and Linden Honey in the characteristic Breitsamer honeycomb glass jar (500g) are particularly popular. We have been certified according to the International Food Standard since 2005 and offer organic, kosher and halal certificates for selected products.
