DIE BIERMACHER.

Die Biermacher

About us

Pfungstädter is the largest private brewery in Hessen, and it has been family run since it was founded in 1831. The combination of tradition and innovation, as well as our attention to detail, are what make our brewery so unique and our beer so popular.

The trust we place in our staff and the commitment of each individual make Pfungstädter what it is: a successful brewery company with over 100 employees, a beer output of around 250,000 hectolitres and a large selection of beer types. The hearts of the beer makers beat in our brewery. Here, the whole force of Pfungstädter can be felt.

Our portfolio for your success

We are at the source: our own. Our excellent brewing water flows directly from the UNESCO Geo-Naturpark Bergstraße-Odenwald to us and is constantly tested by independent research institutes. Due to a special ventilation process, our beer yeast always remains zestful and ensures excellent fermentation qualities. As a strong partner for the region, we also use only the best two-row spring barley, exclusively from Hessian farms. You could hardly get a more Hessian beer! Last but not least, our hops from Hallertau lend our beer its special aroma. Highest regional quality, which you can taste.

We place great value on a regional business cycle. Therefore, we pay close attention to make sure we include farmers, craftspeople and traders from our direct surroundings.

Regional partnerships strengthen the region and contribute to sustainability. Due to our many years of trusting collaboration, we can rely on the quality of the ingredients supplied for our beer. Our procurement of raw materials from Hessen is a special guarantee of the absence of harmful substances and quality.

- Hopfen nur aus der Hallertau
- GQH
- Wasser aus der Odenwaldquelle

- IFS zertifiziert
- strenge Laborkontrollen
