Raw materials by Worlée - quality based on tradition

About us

As a leading producer and refiner of food raw materials, Worlée NaturProdukte GmbH, based in Hamburg-Billbrook, offers a range of different dry products from all over the world. The extensive product range extends from dried raw materials such as fruits and vegetables to spices, medicinal and culinary herbs as well as ingredients for tea and animal feed – both conventional and organic.

At Worlée NaturProdukte, all raw materials undergo a comprehensive quality check, which begins in the countries of origin with the selection of the right suppliers, and are refined by means of state-of-the-art production facilities into high-quality raw materials that are used as natural ingredients in the food processing industry. The company responds to changing market requirements and increasing consumer demand for sustainable products with ecologically produced and fair trade products.

Our portfolio for your success

Customers who use raw materials from Worlée in their finished products can be sure of the most modern quality standards at every level of the company. The traditional Hamburg company places the highest priority on customer satisfaction, and its quality assurance is never left to chance.

We work according to strict guidelines (such as FSSC 22000 or Sedex) that assure transparency in our dealings with suppliers and employees and also guarantee the quality and sustainability of our raw materials.
