Passion for Potatoes

About us

Agrarfrost is a quality and customer oriented, independent company, with a particular focus on sustainable activity. Ever since its foundation in 1967, our family-owned enterprise has been characterised by continuously developed principles and procedures. As an independent company, we operate both nationally and internationally: we are just as much at home on European markets as in South America, USA, Australia, Africa, Asia and the Middle East region. Our innovative products, our excellent skills in potato cultivation and processing as well as our strong focus on customers and quality make Agrarfrost a popular export brand.

Detailed information available at: www.agrarfrost.com

Sustainable quality

The main focus of production is on frozen potato products followed by potato snacks and potato flakes, which are marketed around the globe. Agrarfrost's potatoes have been grown in accordance with the strictest sustainability principles by contract farmers in Germany who have more than 40 years of expertise and know-how. Everything comes from one source: Thus the vertically integrated process chain ranges from breeding the seed potatoes through growing and harvesting, up to producing the potato products in our own plants in Germany. Our own farms as well as some 200 contract farmers are cultivating potatoes on more than 7,000 ha agricultural land in Germany, certified in accordance with Global Gap. A Clean Label Strategy is also implemented in Agrarfrost's high quality policy: All recipes are produced without any artificial flavour enhancers, added aromas or colourings.

- Best potatoes, sustainably grown by Agrarfrost own farming
- Controlled value chain - from farm to fork
- More than 50 years of expertise and experience
- Independent family-owned business
- Wide product range
- Sustainable German cultivation and processing
