Vinegar indulgence from Baden

About us

Friedrich Feldmann GmbH & Co.KG, founded in 1929 and based in Karlsruhe, can look back on a long vinegar tradition. The portfolio of the company with its regional roots includes vinegar specialities, such as apple vinegar (clear and naturally cloudy) and table vinegar, many of them as organic products.

The company sets itself the highest quality standards. For apple vinegar under its own Feldmann brand, for example the company likes to cooperate with local suppliers from the Baden and Lake Constance regions. In addition to its own products, Feldmann specialises in the production of vinegar and mustard for private labels and also offers a wide range of bulk consumer products. With the most modern machines, the company can produce efficiently and at the same time quality focused.

Since 2013, the company has been part of a group of companies together with Speyer & Grund GmbH & Co.KG Mainz.
