## Nutrition suitable for grandchildren from the field to the plate

### About us

Kündig is a family business that thinks and acts globally. We have been refining and trading natural raw materials for the food, animal feed and pharmaceutical industries for over 100 years. Our focus is on safety and quality!

### Products & Quality

**Tradition:** Fairness, honesty, respect and trust - these are the traditional Kündig guiding values. The company makes every effort to ensure that the Kündig brand radiates these guiding values both internally and externally.

**Innovation:** For the long-term existence of our company, it is important to act with foresight, anticipate trends or even create them ourselves.

**Sustainability:** For us, sustainability is the fundamental idea behind all our actions and requires us to ensure success not only temporarily, but also in the long term. This applies to our products as well as to the way we treat people and the environment.

- Bio/Organic
- Biosteril-Natural Steam Sterilization
