## Vitaquell stands for a world in which plant products are taken for granted as the source of life.

### About us

We love vegetarian, vegan, and organic food

In accordance with the principle "best-of-quality," Vitaquell has been producing high-quality food for nutrition- and health-conscious people for almost 100 years. Whether big or small, vegetarians, vegans, "eco" or sophisticated gourmets, Vitaquell offers a broad range of products with a variety of flavors for everyone with over 100 vegetarian, vegan, and organic food products – from A for argan oil to W for wheat germ oil.

Founded in 1922, Vitaquell has been an independent, family-run company rooted in oil and margarine production since 1930. With this expertise and a production culture matured over decades, this traditional company tracks the production of natural food products for the whole-food nutrition for today's health food, natural, and organic trade.

### Our portfolio for your success

Vitaquell - Green by tradition, fairness and responsibility for people, animals, and the environment, as well as our employees and all business partners.

In addition to the actual product quality resulting from the careful selection of premium ingredients, a careful production process, and modern quality management, Vitaquell also focuses on aspects like environmental friendliness, habitat preservation, securing social structures. Fairness and responsibility towards employees, customers, and partners are among the most important principles of its corporate conduct, as well as with regard to following generations.

"We are proud that we have already been recognized with the quality seal of the independent institute new ethics for our consistent thought and behavior characterized by ethics, responsibility, fairness, and transparency." Hermann Pfestorf, CEO.

- We are passionate about using only the best organic ingredients
- Careful processing ensures the retention of nutrients
- Almost 100 years of experience in the plant based food sector
- Constant product innovations from our own product development
- Continuous stringent laboratory controls
