Organic dried Apple-Products in all sizes.

About us

Biosanica GmbH has been producing dried apple products in every form since September 2013.

At our facility in Northern Germany, apples from the top growing areas in Europe are processed with the help of the most modern technology.

Our crispy apple chips, apple cubes and apple pieces are not only a pleasure as a snack. There are no limits to the possible uses of our products. Mueslis, fruit bars, porridge or baking mixes are just a few examples.

Our innovative apple powder is just as versatile. It can be used, for example, as a natural binding agent or sweetener in the baking industry.

Our Range

- Organic Apple-Products in best quality available
- Crisps, Chips, Rings, Cubes, Powder, Fines, Flakes, Juice
- Pesto

- Best quality of raw materials
- Production in Germany
