Connecting competences for innovative solutions!

About us

The Food Processing Initiative supports and assists companies in the food industry in the successful implementation of innovative projects. We offer our members access to a unique knowledge pool and industry network. That's why we cooperate with partners at regional, national and international level from research, development and politics. As a competence hub, we provide the industry with important impulses on its way into the future.

We focus on the relevant topics of the food industry – from quality to sustainable and digital processes & technologies to personnel!

Intersections, connections and added values included: time & cost savings, impulses for innovative future solutions, strengthening competitiveness, individual solutions & offers, independent perspective and notes on funding.

Detailed information available at: <http://www.foodprocessing.de/english/>
