Power of Nature

About us

Ever since Bio-Zentrale Naturprodukte GmbH was founded in 1976, it has been one of the leading organic food companies in Germany. Bio-Zentrale is a full-range organic supplier and, with around 200 products from the brands biozentrale - Kraft der Natur and BioKids stands for ecological agriculture that interferes with nature as little as possible and meaningfully brings together the best of nature.

„We believe in the power of nature“ The Bio-Zentrale knows about the special abilities of nature. Their raw materials are not only carefully cultivated, but also carefully processed. The knowledge of the power of good ingredients, which are combined at the Bio-Zentrale into useful products with an original taste, comes from many years of experience. You can find more information at: www.biozentrale.de/en

Our portfolio for your success

The biozentrale products are particularly diverse. In this way, the organic full-range supplier wants to inspire many people with enjoyable, originally produced organic products and thus contribute to sustainable nutrition. By the brand claim „Power of Nature“, holistic sustainability with carefully selected raw materials, the responsible use of resources and the best possible recyclable packaging are firmly anchored values in the company DNA. The introduction of new products that both serve trends and have promised added value plays a major role here. Bio-Zentrale has recently responded to the increased demand for a varied range of vegan and vegetarian products with the sub-range „biozentrale it's veggie!“ after, whose focus is on vegan meat alternatives. An important cornerstone when it comes to sustainability is the development of ecologically compatible packaging solutions and the award of the „Made for Recycling“ seal by the environmental service provider Interseroh. This shows at a glance whether the packaging is easily or very easily recyclable. Over 87% of the Bio-Zentrale packaging is now certified.
