Professional. Reliable. Individual.

About us

As a contract manufacturer with many years of experience, we work for successful companies. We specialize in the development and production of health foods, dietary supplements, dietetic foods, confectionery and other food products in the form of tablets, hard gelatin capsules and powder blends.

Personal advice and individual service are a matter of course for us.

Thanks to our close cooperation with qualified partner companies, we can offer not only product development and contract manufacturing of food products, but also the entire spectrum in the field of contract packaging as a full service. Our efficient workflows are perfectly coordinated with each other.
